

MIKE'S PANELS
COLD ROOM PANELS AND DOORS

Service door

- Value for money
- Easy installation

Service door

Superior quality service door for intensive use, injected panel, framed with anodized aluminum profile. Robust, durable and with an excellent aesthetic finish and sanitary suitability.

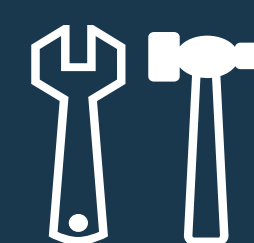

This model is manufactured as standard with a 0.02 in / 0.6 mm thick sheet lacquered in white. As an option, it can be manufactured with finishes in stainless steel, PVC, or other materials, with one or two sheets (depending on measurements). It is a high-performance door, designed to require minimal maintenance.

Thermal isolation

Various sizes available

Easy to assemble and maintain

Description

- The door includes a frame and counterframe in extruded aluminum with double thermal break. High resistance treatment fixed with hidden screws adaptable to different thicknesses.
- The use of high-quality materials and their design are designed so that the door has a minimum level of maintenance.
- The door leaf is made up of a refrigeration panel with polyisocyanurate (PIR)

Our doors stand out for:

- Quality of finishes
- Easy assembly and installation
- Adaptability to customer needs

Technical characteristics
